AquaPearl 500 Pro Product Manual

Last Updated: 2026-01-08

The AquaPearl 500 Pro is an under-sink water purification unit designed for residential kitchens. It uses a single replaceable filter cartridge to reduce sediment, chlorine taste and odor, and common trace contaminants from cold tap water.

Model number: APL-500PRO. Dimensions: 12 in x 5 in x 14 in. Rated flow: 0.5 gallons per minute.

Box Contents

Your AquaPearl 500 Pro package includes the following items:

- 1x AquaPearl 500 Pro purification unit
- 1x Standard Replacement Filter cartridge (pre-installed)
- 1x Inlet hose
- 1x Outlet hose
- 1x Roll of plumber's tape
- 1x Quick-start card
- 1x Power adapter

If any item is missing from your box, contact Pearlz Customer Support with your order number.

Technical Specifications

Filter media: activated carbon block with sediment pre-filter stage.

Operating pressure: 20-90 psi.

Operating temperature: 40-100 degrees F.

Power: 5V DC adapter (included), used for the indicator light and leak sensor only. The unit does not require power to filter water.

Standard Replacement Filter rated life: approximately 6 months of typical household use.

Pro Replacement Filter rated life: approximately 9 months of typical household use.

Filter Maintenance

Replace the filter cartridge when the indicator light turns solid red, or after the rated filter life, whichever comes first.

To replace the filter cartridge:

1. Shut off the cold water supply valve.
2. Press the release button on the filter housing and remove the old cartridge.
3. Insert the new cartridge until it clicks into place.
4. Turn the water supply back on.
5. Flush the unit for 2 minutes as described in the Installation Guide before resuming normal use.

Always use genuine Pearlz Standard or Pro Replacement Filter cartridges. Use of non-Pearlz filters will void the unit warranty as described in the Warranty Policy.

Cleaning and Care

Wipe the exterior housing with a damp cloth only. Do not submerge the unit or use abrasive cleaners or solvents on any part of the unit, as this may damage the housing or electronic components.

Do not attempt to open, disassemble, or repair the unit yourself. Unauthorized disassembly voids the warranty described in the Warranty Policy.
